github.com/parthdhawan921-ops Panchkula, Haryana · open to relocate

SUMMARY

Entry-level business analyst who turns data into decisions priced in money: business cases, unit economics, KPIs and recommendations, across quick commerce, e-commerce, fintech and retail.

SKILLS

Analysis: Business cases, unit economics, KPI design, sensitivity and scenarios

Excel: Financial models, pivot tables, VLOOKUP, charts

SQL: Funnels, cohorts, joins, window functions, Databricks SQL

Python: pandas: aggregation, merges, reconciliation

Reporting: Power BI dashboards, decision memos, Git and GitHub

PROJECTS

Swiggy Instamart break-even model Excel · github.com/parthdhawan921-ops/dark-store-breakeven-model

- Built a live Excel unit-economics model from Swiggy Instamart Q1 FY27 disclosures; break-even lands at ~1,133 orders per store per day.
- Found a 10% bigger basket worth ~₹85 crore a quarter using sensitivity grids, 4 scenarios and a tornado chart.

E-commerce cart leakage and retention

SQL · Databricks · Delta Lake · github.com/parthdhawan921-ops/cart-leakage-analysis

- Sized a $3.93M/month cart-abandonment leak (76.5% of 4.52M carts) by querying 20.7M events in Databricks SQL on Delta tables.
- Traced half the leak to 23 of 465 categories (Pareto) and priced a reminder at ~$91K/month net; measured a 9.2% next-month repeat rate.

India's UPI payments: PhonePe Pulse

Python · pandas · github.com/parthdhawan921-ops/phonepe-pulse-analysis

- Analysed 20.5B UPI transactions (₹35.6 lakh crore) across 36 states and 723 districts in pandas; quarterly volume grew ~29×.
- Showed adoption drives volume (r = 0.80) more than density (0.31), after reconciling district vs state totals and fixing a running-total double count.

AI-assisted retail analytics pipeline

Python · Power BI · Claude Code · github.com/parthdhawan921-ops/norda-ai-analyst-system

- Automated a monthly retail report into one command (under 30 s) with Python and Claude Code: star schema, 41-check quality gate, dashboard, deck and Power BI model.
- Cleaned 160,821 order lines (3,997 duplicates, 16 brand spellings to 6) and found €274K to €442K of December sales lost to stock-outs.

EDUCATION

Bachelor of Pharmacy, Chitkara University, Himachal Pradesh · CGPA 7.21/10 2021 to 2025

CERTIFICATIONS

Coding Ninjas: Advanced Certification in Data Analytics with Generative AI (2025 to now) · LinkedIn Learning: Claude Code for Data Analysis; Databricks for Data Analysts · Anthropic Academy: Claude 101
