github.com/parthdhawan921-ops Panchkula, Haryana · open to relocate

SUMMARY

Entry-level analyst who builds financial models and research from public filings and official data: a quick-commerce break-even model, CPI inflation research and a fintech market study, with reconciled, auditable data.

SKILLS

Modelling: Excel financial models, break-even, sensitivity grids, scenarios, tornado charts

Research: Macro and market research, YoY and MoM analysis, correlation

Data: SQL, Python (pandas), reconciliation and validation checks

Reporting: Pivot tables, charts, one-page summaries

Tools: Power BI, Git and GitHub

PROJECTS

Swiggy Instamart break-even model Excel · github.com/parthdhawan921-ops/dark-store-breakeven-model

- Built a live Excel unit-economics model from Swiggy Instamart Q1 FY27 disclosures; break-even lands at ~1,133 orders per store per day.
- Found a 10% bigger basket worth ~₹85 crore a quarter using sensitivity grids, 4 scenarios and a tornado chart.

India CPI inflation, 2017 to 2023 Excel · github.com/parthdhawan921-ops/cpi-inflation-analysis

- Analysed MoSPI CPI data in Excel (pivot tables, VLOOKUP, 33 CORREL tests): inflation peaked at 6.62% in 2022 and eased to 3.18%.
- Measured pre vs post COVID inflation by category (transport 0.29% to 0.66% a month) and found a weak crude oil link (max 0.13).

India's UPI payments: PhonePe Pulse

Python · pandas · github.com/parthdhawan921-ops/phonepe-pulse-analysis

- Analysed 20.5B UPI transactions (₹35.6 lakh crore) across 36 states and 723 districts in pandas; quarterly volume grew ~29×.
- Showed adoption drives volume (r = 0.80) more than density (0.31), after reconciling district vs state totals and fixing a running-total double count.

SQL data warehouse and analytics

SQL · MySQL · github.com/parthdhawan921-ops/sql-data-warehouse-analytics

- Built a MySQL Medallion warehouse (Bronze, Silver, Gold) joining 6 CRM and ERP sources (~116K rows) into a star schema, with 13 SQL analyses using CTEs and window functions.
- Found and fixed 2 silent loading bugs (CRLF line endings, empty prices zeroing sales); extended the quality checks and added GitHub Actions CI.

EDUCATION

Bachelor of Pharmacy, Chitkara University, Himachal Pradesh · CGPA 7.21/10 2021 to 2025
