SUMMARY

Entry-level data analyst who builds end-to-end pipelines: raw data to a cleaned star schema, quality checks, then dashboards and SQL analysis. Four public projects on 20M+ rows, each with a GitHub repo and a business recommendation.

SKILLS

SQL: MySQL, Databricks SQL, CTEs, window functions, joins, views, ETL

Python: pandas, NumPy, Matplotlib, Jupyter

BI: Power BI, DAX, Power Query, KPI dashboards

Data: Star schema (junk, bridge and role-playing dimensions), Medallion architecture, data quality checks

Tools: Excel, Git and GitHub, GitHub Actions, Claude Code

PROJECTS

One-command retail analytics pipeline

Python · Power BI · Claude Code · github.com/parthdhawan921-ops/norda-ai-analyst-system

- Built a one-command Python pipeline (profile, clean, star schema, 41-check quality gate) producing a dashboard, deck and Power BI model in under 30 s.
- Cleaned 160,821 order lines (3,997 duplicates, 16 brand spellings to 6) and found €274K to €442K of sales lost to stock-outs.

SQL data warehouse and analytics

SQL · MySQL · github.com/parthdhawan921-ops/sql-data-warehouse-analytics

- Built a MySQL Medallion warehouse joining 6 CRM/ERP sources (~116K rows) into a star schema; 13 SQL analyses with CTEs and window functions.
- Found and fixed 2 silent loading bugs (CRLF line endings, empty prices zeroing sales); added quality checks and GitHub Actions CI.

Power BI data model makeover

Power BI · Power Query · DAX · github.com/parthdhawan921-ops/powerbi-data-modeling-project

- Rebuilt a 20-table "nightmare" Power BI model into a 13-table star schema (6 facts, 6 dimensions) with Power Query, surrogate keys and DAX measures.
- Applied junk, bridge and role-playing dimensions, unpivoted wide inventory data, removed test records and added a security table for RLS.

Cart leakage and repeat cohorts SQL · Databricks · github.com/parthdhawan921-ops/cart-leakage-analysis

- Queried 20.7M clickstream events in Databricks SQL to size a $3.93M/month cart-abandonment leak (76.5% of 4.52M carts).
- Pareto and cohort analysis: 23 of 465 categories hold half the leak; priced a reminder nudge at ~$91K/month net.

EDUCATION

Bachelor of Pharmacy, Chitkara University, Himachal Pradesh · CGPA 7.21/10 2021 to 2025
