github.com/parthdhawan921-ops Panchkula, Haryana · open to relocate

SUMMARY

Entry-level product analyst focused on conversion, retention and experiments. Sized a $3.93M/month cart leak, ran a 64,000-customer A/B test with uplift modelling, and modelled quick-commerce unit economics.

SKILLS

Product analytics: Funnels, cohorts, retention, segmentation, A/B testing, uplift modelling

SQL: Databricks SQL, CTEs, window functions

Python: pandas, scikit-learn, bootstrap, statistical tests

Business: Unit economics, AOV, GMV, contribution margin

Tools: Excel, Power BI, Git and GitHub

PROJECTS

Cart leakage and repeat cohorts SQL · Databricks · github.com/parthdhawan921-ops/cart-leakage-analysis

- Queried 20.7M clickstream events in Databricks SQL to size a $3.93M/month cart-abandonment leak (76.5% of 4.52M carts).
- Pareto and cohort analysis: 23 of 465 categories hold half the leak; priced a reminder nudge at ~$91K/month net.

Who should get the email? Python · scikit-learn

- Analysed a 64,000-customer randomised email test: +$0.77 spend per customer (95% CI $0.50 to $1.07) with bootstrap and BH-corrected segment tests.
- Built a T-learner uplift model (scikit-learn) and showed blanket sending beats targeting: $131 vs $73 profit per 1,000.

Dark-store break-even model Excel · github.com/parthdhawan921-ops/dark-store-breakeven-model

- Built a live Excel unit-economics model from Swiggy Instamart Q1 FY27 disclosures: break-even at ~1,133 orders/store/day.
- Sensitivity grids, 4 scenarios and a tornado chart: a 10% bigger basket is worth ~₹85 crore a quarter.

India's UPI payments: PhonePe Pulse

Python · pandas · github.com/parthdhawan921-ops/phonepe-pulse-analysis

- Analysed 20.5B UPI transactions (₹35.6 lakh crore) across 36 states and 723 districts with pandas; quarterly volume grew ~29×.
- Reconciled district vs state totals and corrected a running-total double count; adoption drives volume (r = 0.80) more than density (0.31).

EDUCATION

Bachelor of Pharmacy, Chitkara University, Himachal Pradesh · CGPA 7.21/10 2021 to 2025
