PARTH DHAWAN

Aspiring Product Analyst

Panchkula, Haryana | +91 7082335959 | parthdhawan921@gmail.com | LinkedIn | GitHub | Portfolio

Profile Summary

Aspiring Product Analyst with hands-on project experience in **SQL, Python, Power BI and Excel**, covering funnel analysis, cohort and retention analysis, A/B testing and experimentation, user segmentation and unit economics on e-commerce and quick-commerce data of up to **20.7M events**. Skilled at defining product KPIs, testing hypotheses with statistical rigor and turning user behavior into clear product recommendations.

Projects

E-Commerce Funnel, Cart Leakage & Retention Analysis | GitHub | Case Study | *SQL* | *Databricks* **October 2026**

- Analyzed **20.7M clickstream events** in SQL on Databricks to build view-to-cart-to-purchase funnels and retention cohorts.
- Found **76.5% cart abandonment** worth **$3.93M/month**, half in 23 of 465 categories; only **9.2%** of new buyers returned in month 1.
- Designed a cart-reminder experiment with a holdout group, sized at **~$91K/month** net at a 10% recovery rate.

Email Campaign A/B Test & Uplift Targeting | GitHub | Case Study | *Python* | *scikit-learn* **October 2026**

- Analyzed a **64,000-customer A/B test**: the men's email lifted visits from 10.6% to 18.3% and spend by **$0.77/customer**.
- Tested 38 user segments with **Benjamini-Hochberg correction** and benchmarked a cross-validated **uplift model** vs a simple rule.
- Recommended the simple rule, earning **$131 extra profit per 1,000 customers**, as model targeting would have cut profit by 44%.

Dark-Store Break-Even Model (Swiggy Instamart) | GitHub | Case Study | *Excel* **October 2026**

- Modeled per-order **unit economics** (AOV, take rate, rider cost, contribution margin) for Swiggy Instamart in Excel from Q1 FY27 data.
- Found break-even at **~1,133 orders/store/day** vs ~1,075 today and ranked AOV as the biggest lever with a tornado chart.
- Showed a **10% bigger basket** is worth **~Rs 85 crore/quarter**, while a discount war lifts orders but cuts margin to -1.3%.

Bike-Sharing Demand Analysis & Power BI Dashboard | GitHub | Case Study | *SQL* | *MySQL* | *Power BI* **August 2026**

- Analyzed **50,000 trips and 5,000 riders** in SQL (CTEs, window functions) to profile demand by hour, day type and rider segment.
- Built a **3-page Power BI dashboard** with DAX measures and slicers for city, ride type and date to track usage and revenue KPIs.
- Found weekends are busier **per day (138 vs 136 trips)** despite 29% of totals; 60.3% of fare revenue comes from subscriptions.

Technical Skills

Product Analytics: Funnel Analysis, Cohort & Retention Analysis, A/B Testing & Experimentation, Hypothesis Testing, User Segmentation, Product Metrics & KPIs, Unit Economics

Data Analysis & Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn), Statistical Analysis, Confidence Intervals, Uplift Modeling, EDA

Database Management & Querying: SQL, MySQL, Databricks, Joins, CTEs, Subqueries, Window Functions, Data Modeling

Business Intelligence & Reporting: Power BI, DAX, Power Query, Dashboards, Excel (Pivot Tables, Scenario Analysis), KPI Reporting

Soft Skills & Tools: Analytical Thinking, Problem-Solving, Data Storytelling, Stakeholder Communication, GitHub, Jupyter Notebook, PowerPoint, AI-Assisted Analysis (Claude Code)

Education

Chitkara University (CGPA: 7.21/10) **2021 - 2025**

Bachelor of Pharmacy *Himachal Pradesh*

Trainings and Certificates

Coding Ninjas

Advanced Certification in Data Analytics with Generative AI

- Introduction to Analytics & Excel | Data Visualization with Power BI | SQL for Data Analysis

LinkedIn Learning

- Claude Code for Data Analysis: Build Repeatable, Reliable Workflows | Databricks for Data Analysts

Anthropic Academy
