PARTH DHAWAN

Aspiring Data Analyst

Panchkula, Haryana | +91 7082335959 | parthdhawan921@gmail.com | LinkedIn | GitHub | Portfolio

Profile Summary

Aspiring Data Analyst with hands-on project experience in **SQL, Python, Power BI and Excel**, covering data cleaning, data validation, exploratory data analysis (EDA), ETL, data modeling and interactive dashboards on datasets of up to **20.7M records**. Skilled in complex SQL (joins, CTEs, window functions), DAX measures and KPI reporting, and eager to turn data into clear, data-driven recommendations for business stakeholders.

Projects

E-Commerce Funnel, Cart Leakage & Retention Analysis | GitHub | Case Study | *SQL* | *Databricks* **October 2026**

- Loaded and cleaned **20.7M clickstream events (2.4 GB)** into Delta tables on Databricks, removing 5.8% duplicate and invalid rows.
- Wrote SQL (CTEs, window functions) to build purchase funnels and retention cohorts, finding **76.5% cart abandonment**.
- Quantified **$3.93M/month in lost revenue**, half in **23 of 465 categories**; sized a cart-reminder nudge at **~$91K/month**.

UPI Payments Analysis (PhonePe Pulse) | GitHub | Case Study | *Python* | *Pandas* **October 2026**

- Cleaned and merged **5 PhonePe Pulse datasets** (36 states, 723 districts, 2018 to 2021) in Python (Pandas, NumPy) for EDA.
- Found UPI transactions grew **29× in three years** and that user adoption drives volume (**r = 0.80**) far more than density (0.31).
- Caught a running-total double count and a district over-count (1,050 vs 75) before reporting; visualized trends in Matplotlib.

Bike-Sharing Demand Analysis & Power BI Dashboard | GitHub | Case Study | *SQL* | *MySQL* | *Power BI* **August 2026**

- Built a **3-page Power BI dashboard** with DAX measures and slicers on **50,000 trips** across 7 MySQL tables (5 US cities).
- Wrote 8 SQL scripts (CTEs, window functions) and **7 validation checks**, flagging 3,461 impossible trips and 72 overfull stations.
- Showed weekends are busier **per day (138 vs 136 trips)** despite only 29% of total trips; built a rebalancing list for 32 stations.

SQL Data Warehouse & Analytics | GitHub | Case Study | *MySQL* | *ETL* | *Star Schema* **August 2026**

- Built an **ETL pipeline** in MySQL with Bronze, Silver and Gold layers, integrating **6 CRM and ERP sources (116K rows)**.
- Modeled a **star schema** (18,484 customers, 60,398 sales lines) and wrote **13 SQL analyses** with CTEs and window functions.
- Found **bikes drive 96.5%** of $29.36M in sales and **80% of customers are new**, making retention the biggest growth lever.

Technical Skills

Data Analysis & Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), EDA, Data Cleaning, Data Validation & Reconciliation, Statistical Analysis, A/B Testing

Database Management & Querying: SQL, MySQL, Databricks, Joins, CTEs, Subqueries, Window Functions, Data Modeling, Star Schema, ETL

Business Intelligence & Reporting: Power BI, DAX, Power Query, Data Visualization, Dashboards, KPI Reporting, Advanced Excel (Pivot Tables, XLOOKUP, Scenario Analysis)

Business Analysis: Funnel, Cohort & Retention Analysis, Customer Segmentation, Pareto Analysis, Unit Economics, GMV, AOV

Soft Skills & Tools: Analytical Thinking, Problem-Solving, Attention to Detail, Data Storytelling, Stakeholder Communication, GitHub, Jupyter Notebook, PowerPoint, AI-Assisted Analysis (Claude Code)

Education

Chitkara University (CGPA: 7.21/10) **2021 - 2025**

Bachelor of Pharmacy *Himachal Pradesh*

Trainings and Certificates

Coding Ninjas **2025 - Present**

Advanced Certification in Data Analytics with Generative AI

- Introduction to Analytics & Excel (Mar 2026) | Data Visualization with Power BI (Jun 2026) | SQL for Data Analysis (Aug 2026)

LinkedIn Learning **Sep 2026**

- Claude Code for Data Analysis: Build Repeatable, Reliable Workflows | Databricks for Data Analysts

Anthropic Academy **Sep 2026**

- Claude 101
